Senior React Native & Full Stack engineer with 9 years building fintech, health, and IoT products. Currently owning features end to end — backend, web and mobile — at a US fintech (Node.js, React, React Native). Strong in performance work, native modules (Kotlin, Swift, Objective-C), release management and CI/CD; shipped 10+ apps to the App Store and Google Play.

SKILLS

Core	React Native, React, TypeScript, Node.js, GraphQL, Redux, Apollo, React-Query, Expo, Remix.js
Mobile / Native	Swift, SwiftUI, Objective-C, Kotlin, Jetpack Compose, native modules
Backend / Infra	Node.js, Python, Django, Docker, PostgreSQL, Redis, CI/CD, VPS
Leadership	Team leadership (up to 10), mentoring, technical interviewing, client communication, pre-sales, project estimation

EXPERIENCE

Fluz — Senior Full Stack / React Native Engineer Nov 2023 – Present
US fintech — virtual cards, cashback, business spend; \$5B+ payments processed. Node.js, React, Remix.js, React Native.

- Took Fluz from single-user to **multi-user accounts**: designed and implemented access roles, invites, and virtual-card sharing across backend, web, and mobile. Enabled corporate and family spend on a previously single-user (KYC / KYB) product.
- Own core money-flow features: deposit / withdraw, virtual cards, third-party payment and banking integrations — across backend, web (React SPA + Remix.js), and mobile (React Native).
- Migrated the mobile app to a new architecture, including native navigation; cut app RAM usage by **40%**.
- Built a **realtime service** and integrated the mobile and web clients with it.
- Delivery on the first engagement led Fluz to grow the Geniusee team from **1 to 8 developers**. Manage releases across iOS / Android and web.

IoT fleet platform (NDA) — Python / Django + React Native 2023

- Built a Modbus protocol bridge for in-vehicle equipment across a 10-vehicle fleet.
- Developed native Android components with Mapbox integration; maintained and extended Django backend and React Native features; ran VPS infrastructure on Docker.

Geniusee — Senior React Native / Full Stack Developer 2020 – 2023
Long-term product engagements for US / EU clients; led React Native teams of 2–3.

- **WayWiser** (2022–2023) — Senior React Native Developer. Improved app performance **2x** (up to **3x** on specific screens); migrated Expo to React Native CLI, set up CI/CD, and led a full UI redesign.
- **MembaMe** (2021–2022) — Technical Lead. Led a React Native + backend team of two; built custom animations and gesture-driven interactions for an event-invitation app.
- **Umine** (2021–2022) — Led 2–3 RN developers; built Kotlin modules, drag-and-drop, and video player interactions.
- **Swyft** (2021) — Team Lead, 2–3 RN developers. Integrated banking SDK via Objective-C / Java wrappers.
- **Maxint** (2021) — Flutter fintech app architecture, Plaid integration, App Store / Google Play releases.
- **Skoove** (2020–2021) — Senior RN Developer. Music app (**1M+ installs**); UI redesign, native modules, stability.

DreamBit — React Native Developer 2018 – 2020

- **eForce** — esports streaming app built from scratch (**100k+ installs**), including live video streaming.
- **Stoovo** — early-stage fintech, built from scratch: shared-transition navigation, banking-service integrations.

PERSONAL PROJECT

Sai — dog walking & pet care [GitHub: iOS](#) · [GitHub: Backend](#)

- Built a SwiftUI app and Python / FastAPI backend with GraphQL and PostgreSQL: live GPS walk tracking, local walk persistence, activity stats, and a pet care calendar with scheduled push notifications.

EDUCATION

Bachelor's Degree in Marketing
